

*Your home is worth it*

## CHARACTERISTICS:

- ❑ Increased privacy provided by the lack of gaps
- ❑ Protection and safety
- ❑ Limited noise emissions
- ❑ Protection against weather conditions (wind, sun rays)
- ❑ Rigidity of the structure resistant to thermal effects
- ❑ Made of a hollow profile to provide high fence rigidity

## ALUX

MODERN ALUMINUM FENCES IN FULL SOLID VERSION

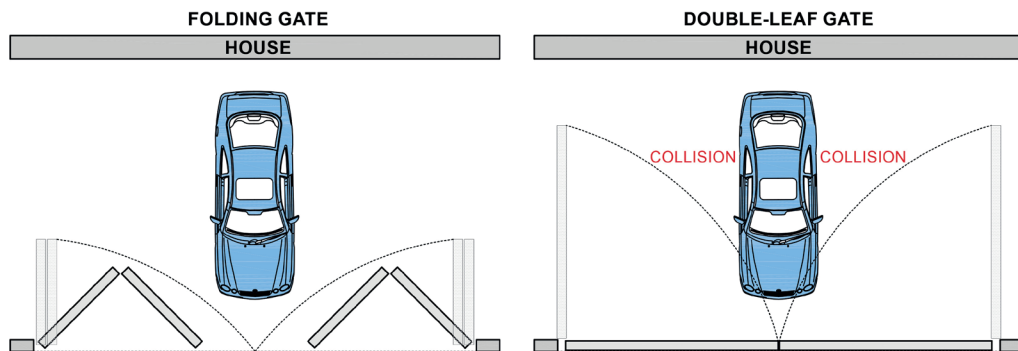

**FULL SOLID FENCING** - ensures one of the most crucial matters, which is safety. It isolates the property from noisy neighbours or busy roads. Not only will it cover the view and protect against pollution from the street, but it will also, to certain extent, reduce the noise coming from outside. Another reason is to ensure comfort and privacy. A full solid fence will create the boundaries of the garden. Not to dominate the surroundings, it is worth planning, even at the initial stage of building a house, by choosing its shape and colour to match the building façade. A full fence will also work well in terraced house estates, especially where we want to shield ourselves from the proximity of neighbours in an attractive way.

# FOLDING GATES WITH FULL SOLID FENCES

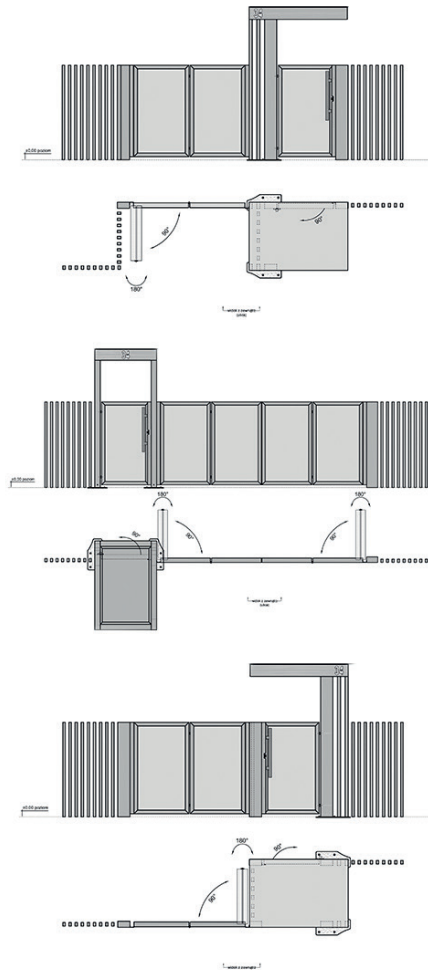

## FOLDING GATE FOR SMALL PROPERTIES

- The leaflet is for information purposes only and does not constitute an offer within the meaning of the Civil Code.
- The products presented in the leaflet may be custom-made or contain special elements.
- As a manufacturer, we reserve the right, without notifying the Buyer, to introduce technological changes that improve the quality and functionality of our products.
- The colours shown in the leaflet may differ from the actual ones. Copying only with the consent of Plast-Met Sp. z o.o. All rights reserved.

## VARIANTS

**FOLDING GATES** - A narrow or small plot, a problematic entrance to the property located close to a street or building, a steep driveway preventing the gate from opening or other situations where there is no space for locating or opening the gate no longer have to be a problem. Our company offers folding entrance gates. It is an automatically foldable structure, that enables you to save both time and space on the plot. Compared to standard double-leaf gates, folding gates require 50% less space to open.

## POSSIBLE WAY OF FOLDING THE GATE
